National and State Delegation Emblems

This document contains vectored (infinite resolution) versions of the National TSA Emblem and State Delegation Emblems. Besides simply printing a specific page, it is possible to export bitmap and alternative format versions of these emblems using various proprietary and open-source programs.

Emblems are organized alphabetically, beginning with the emblems of the 50 United States and followed by emblems representing all other nations and states.

Geographical areas represented include the 50 states in the United States of America, U.S. Territories, Member States of the United Nations, and territories geographically distant enough from their mother countries to make the development of a single state delegation unreasonable.

States are listed regardless of their current status with the National TSA as a chartered state delegation.

The representative title or presence/absence of states in this document are certainly not intended to be divisive or represent a specific ideological agenda. Technology Student Association delegations wishing to modify the title used to represent the delegation should contact the National TSA Office.
